

SPONSOR PACKET · 2026-27 SEASON

TEXAS BUILDS A RACE BIKE.

Texas Moto Racing is the first motorcycle engineering team at The University of Texas at Austin. Eighteen months to design, build and race a prototype competition motorcycle — finishing on track at MotorLand Aragón, a FIM Grand Prix circuit in Spain.

MotoStudent International Competition · entry No. 40 · Austin, Texas

WHO WE ARE

STUDENTS. ONE MOTORCYCLE. A GRAND PRIX CIRCUIT.

We are a student organisation at The University of Texas at Austin, founded in 2026 to enter the IX MotoStudent International Competition. No Texas university has ever fielded a team. We intend to be the first, and to finish the race.

MotoStudent is run by the Moto Engineering Foundation under FIM sanction. Every team receives the same component kit — engine, tyres, brakes, electronics — and the same eighteen months. Everything else is designed, manufactured and assembled by registered students: chassis, swingarm, suspension geometry, bodywork, wiring, data. The rules forbid professional engineers or mechanics from touching the bike.

WHY SPONSOR A FIRST-YEAR TEAM

Because the first bike is the one people remember. Your mark rides on the prototype from its first roll-out in Austin to the grid in Spain, in every photograph, every livestream frame and every recruiting slide for years afterwards. And the students who build it — mechanical, electrical, aerospace and business majors — are the hires you want a year before anyone else meets them.

WHAT THE TEAM IS ORGANISED AROUND

- **Chassis & structures** — frame, swingarm, subframe; FEA, fixturing, welding
- **Vehicle dynamics** — geometry, suspension, mass distribution, brake balance
- **Powertrain integration** — intake, exhaust, cooling, fuel, final drive
- **Electronics & data** — harness, ECU calibration, sensors, data acquisition
- **Bodywork & aero** — fairing design, CFD, moulds and composite layup
- **Business & operations** — budget, sponsorship, freight, travel, communications

THE COMPETITION

TWO PHASES, SCORED INDEPENDENTLY

MS1 · ENGINEERING & MANAGEMENT

- Team plan and internal organisation
- Product definition with safety calculations
- Innovation submission
- Full 3D CAD model and drawing package
- Economic plan and budget control
- Pitch presentation
- Final defense before an international jury

MS2 · DYNAMIC & PERFORMANCE

- Technical scrutineering — pass or you don't run
- Dynamic safety check
- Free practice and qualifying
- Wheel-to-wheel racing at MotorLand Aragón

Autumn 2027. Both phases count toward the overall classification.

CALENDAR · FROM THE MS2627 REGULATIONS

WINDOW	DELIVERABLE	ARTICLE
1-30 Nov 2026	MS1-1 — Team plan	A.6.4.1
1-28 Feb 2027	MS1-2 — Product definition and safety calculations	A.6.4.2
1-30 Apr 2027	MS1-3 — Innovation	A.6.4.3
1-31 May 2027	MS1-4 — Prototype CAD and technical drawings	A.6.4.4
1-31 May 2027	MS1-5 — Economical plan	A.6.4.5
1-30 Jun 2027	MS1-6 — Pitch presentation	A.6.4.6
1-31 Aug 2027	Rider eligibility declaration	A.6.6.1
Autumn 2027	Final event — scrutineering, jury defense, MS2 racing	A.6.7.1

Where sponsors come in. Cash and in-kind commitments made by December 2026 shape the design itself — material choices, machining routes, the suspension we can afford to run. Commitments after May 2027 still ride to Spain on the finished bike.

WHAT YOUR SUPPORT BUILDS

A \$95,000 PROGRAMME, MOSTLY RAISED FROM INDUSTRY

Programme cost across three semesters, low and high estimates. Figures in US dollars; the registration fee is set by the organiser in euros.

LINE ITEM	LOW	HIGH
Competition registration fee	5,000	5,300
Chassis: frame, swingarm, subframe — materials, machining, welding	12,000	20,000
Suspension, brakes, wheels, controls	7,500	14,000
Bodywork: fairing moulds and layup, seat, screen	3,000	6,000
Electronics: ECU, harness, sensors, data logging	4,000	8,000
Consumables, fasteners, fluids, spares	3,000	5,000
Domestic testing: track rental, transport	3,000	6,000
Insurance valid in Spain, incl. third-party	1,500	4,000
Rider licence and rider costs	500	1,500
International freight, ATA Carnet, customs broker	6,000	12,000
Travel to the final event — ten students plus tutors	24,200	33,000
Contingency (10%)	6,970	11,480
Total programme cost	76,670	126,280

FUNDING PLAN · \$95,000 TARGET

SOURCE	TARGET
Industry sponsorship — cash and in-kind	50,000
In-kind machining, materials, components	13,000
Crowdfunding and alumni giving	18,000
Departmental and student-organisation grants	11,000
Award prize money (contingent)	3,000
Total	95,000

PARTNERSHIP LEVELS

PUT YOUR NAME ON THE FIRST ONE

Paddock

\$1,000+

- Logo on the website and team media
- Season updates and build photos
- Invitation to the roll-out in Austin

GRID

\$5,000+

- Logo on the fairing and pit board
- Everything in Paddock
- Team resume book and a recruiting visit
- Named in the MS1 pitch and jury defense

WORKS

\$15,000+

- Title placement on the bike and team transport
- Everything in Grid
- Design reviews with the team, on your terms
- First call on the finished bike for your events

IN-KIND SUPPORT

Machining time, raw stock, composites, suspension components, software seats, dyno or track time — credited at fair value toward a level, and often worth more to us than cash. Tell us what you make; we will tell you where it goes on the bike.

WHERE YOUR MARK RIDES

FAIRING SIDES — largest surfaces, in every side-on photograph and the livestream

PIT BOARD, TEAM WEAR, TRANSPORT — the paddock, the roll-out, campus events

TAIL AND SCREEN — visible from the grandstand and the on-board camera

WEBSITE AND SOCIAL — sponsor strip on every page; build updates through the season

BELLY PAN AND SWINGARM — low, wide, and in every pit-lane shot

MS1 DOCUMENTS — named in the economic plan, pitch and jury defense

Placement follows the competition's technical regulations for number boards and mandatory organiser branding; final positions are agreed with each partner before the livery is painted.

HOW IT WORKS

THREE STEPS, NO PAPERWORK YOU DIDN'T ASK FOR

1 · A CONVERSATION

Thirty minutes, on a call or at our workshop. What you make, what you want out of it, and what level fits.

2 · A ONE-PAGE AGREEMENT

Level, deliverables, dates, and how in-kind support is valued. Signed by the team leader and the faculty tutor.

3 · UPDATES YOU'LL ACTUALLY READ

A short build note each month with photographs, milestone results and where your mark is on the bike.

DECISION TIMELINE

WHEN	WHAT IT MEANS FOR A PARTNER
By Dec 2026	Founding partner. Shapes the design; named in the first team plan.
By May 2027	On the bike before it is painted; in the CAD package and economic plan.
By Aug 2027	Rides to Spain. Livery, pit board and team wear.
